Profile

Hello, I'm Stefan Ivanus, a full-stack web developer based in Zürich. My passion for coding stems from its ability to open doors to endless possibilities. Being a full-stack developer allows me to have a comprehensive view of projects, which helps me better understand client needs while satisfying my curiosity about various web development methods. In addition to coding, I'm also interested in computer hardware and software. I love tinkering with PCs, trying out new software, and fixing small issues with operating systems.

Skills

JavaScript	**Node.js**
React.js	**Express.js**
SQL	**Typescript**
Bootstrap	**Git**
GitHub	**SCRUM**
Agile	**Tailwind CSS**
CSS	**HTML5**

PC Hardware
Very good understanding of computer anatomy, drivers and components configurations and device connections.

Soft Skills
Teamwork, Reliability, Problem-solving, Adaptability, Collaboration, Perform well in stressful situations, Communication

Education

2022 – 2023 Berlin, Germany	**Wild Code School,** Full-Stack Web Developer
2009 – 2010 Romania	**Internship,** Technician in Economic Activities
2005 – 2008 Romania	**Highschool,** Technician in Economic Activities

Languages

Romanian	**English**	**German**
Native	C1	B2

Projects

Star Rentals, Car rental app ⇗

As a personal project, I built Star Rentals, a fully functional car rental application using Next.js and Tailwind CSS. It includes a car booking feature, user profile editing, and utilizes several external libraries for enhanced functionality.

Grocery Delivery App "Backend", Work in Progres ⇗

As a personal project I developed the backend for the Grocery Delivery App, which is designed to provide a seamless online grocery ordering experience. Technologies used include Argon2, Express, and MySQL. The app is a work in progress, and I am continually improving it to enhance the customer experience.

News scraper API, News scraper API ⇗

As a personal project, I created an API using Express.js and the Cheerio npm package. This allowed me to gain hands-on experience with back-end web development and taught me the importance of utilizing external libraries to enhance functionality.

Space Explorer, All about space ⇗

Collaborating with a team, I helped develop a Space Explorer Web App using JavaScript, React.js, Node.js, and CSS. We incorporated APIs for space news and NASA data, creating an interactive and visually appealing user interface. This project expanded my skills in front-end and back-end development and API integration.

Professional Experience

05/2023 – present Zürich, Switzerland	**Hitzberger,** Schichtleiter Als Schichtleiter bei Hitzberger bin ich für das Training neuer Mitarbeiter, den Kundenservice, den Verkauf von Produkten sowie die Einhaltung der Vorgaben meines Arbeitgebers verantwortlich.
